Job Shadowing – Your glimpse into working life

As a job shadow you follow (i.e. “shadow”) a professional for one day at work. You do not participate in working but simply observe your job shadowing partner during their usual working day.

Job Shadowing offers you the opportunity to get to know the work routine in a specific professional field or company. It can help you to get information about different career prospects and business cultures, and to establish first professional contacts.

Get started with your career now!

Want to become a job shadow? Here's how it works:

- Inform yourself about participating companies and positions on our website.
- Register for your desired company via the online form. We forward your registration to the company.
- If the company approves, you will receive the contact details of your job shadowing partner. Please contact him or her to arrange all the details, like date and time for your job shadowing day.
- You can prepare yourself by researching the company a bit. But don't worry: It will not be expected that you already know the company by heart. Your contact person will give you a short overview before the beginning of the work day.
- On the job shadowing day you should be, first and foremost, curious. Ask questions and be yourself.
- After completing your job shadowing day, please send us a brief report about your experience (5- 10 sentences).
- Don't forget to also thank the company and your personal contact! They will be happy to receive some personal feedback from you as well.
